

WASATCH FRONT REGIONAL COUNCIL

Utah is experiencing substantial growth. Several local agencies are working to plan for that growth with long-range land-use and transportation plans.

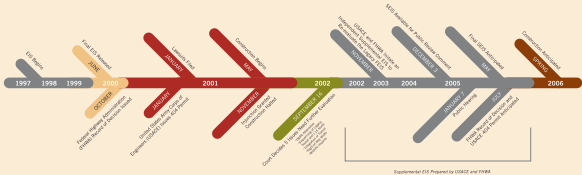

The Wasatch Front Regional Council provides the basic planning information for all transportation projects along the Wasatch Front. By working from one source, transportation solutions under the jurisdiction of different agencies can be integrated in such a way that they complement each other and function together.

WHERE DID THE LEGACY PARKWAY & PRESERVE CONCEPT DEVELOP?

- A transportation corridor west of I-15 has been on the Wasatch Front Regional Council long range plan since 1965.
- The Western Transportation Corridor Major Investment Study developed the concept for a transportation corridor in the area of Weber, Davis and north Salt Lake counties. This concept was used in the evaluation of the Legacy Parkway Final Environmental Impact Statement.
- In response to a ruling by the 10th U.S. Circuit Court of Appeals, the U.S. Army Corps of Engineers and the Federal Highway Administration took another look at the Legacy Parkway Final EIS and prepared a Supplemental EIS. This Open House explains and illustrates the findings of the studies prepared by the federal agencies.
